Scope of Work: Correct costs from TDD 1106-05, Upper Animas Mining District so correctly associated with new Site Name Upper Cement Creek and SSID: A830. Revise Draft HRS package for the Upper Cement Creek site based on EPA and EPA Quality Assurance contractor comments and QA conference calls. Includes Documentation Record development, finalization, and comment review and response. Revise Draft Wetland delineation report and Trip Report in support of the HRS package needs. Add a Letter Addendum to the existing Analytical Results Report to include the August 2011 event and data. Note all revisions in the header and footer by revision number and month/day/year the revision was made. Additional tasks: <ul style="list-style-type: none"> • Provide field parameters for both sampling events in one table with field notebook pages included as primary references. • Confirm and document all sample locations' latitudes and longitudes from Fall 2010 and Summer 2011 events; cross-reference them with existing Animas River Stakeholders Group water quality sampling locations in one table. • Collect additional primary references, as needed, to support the HRS Documentation Record. • GIS Technical Support for maps and figures illustrating HRS-related features and data. • Chemistry support for calculating SQLs and other data determinations related to HRS 		Overtime Approved: X- Yes ---- No					

needs. <ul style="list-style-type: none"> • Potential re-evaluation of site score or scenarios to determine potential site score if site conditions were to change, e.g., some sources removed. • Other tasks as EPA determines needs based on the HRS package requirements for finalization. <p>This effort will require extensive HRS and listing experience because there is potential for significant PRP comments.</p>			
Deliverables & Schedule (Including Technical Completion Date) Attend scoping and technical support meetings with EPA Revisions and resubmittals of draft HRS package and references Finalize HRS package for potential Federal Register Proposal by January 26, 2012. Review comments Prepare Final HRS package or coordinate with EPA to compile information to finalize the HRS package for Final Rule. Attend meetings with EPA NPL Coordinator to address comments and assist with response to comments, as needed.			
PRP Names (if known at this time): Sunnyside Gold Corp., Kinross Gold, Mueller Industries. There may be more.
